

LOCAL GOVERNMENT STRATEGIC AND SERVICE PLANNING SPECIALISTS

Professional Advice, Practical Solutions

COUNCIL PLANNING

Developing an effective Council Plan, achieving community aspirations for the future services and facilities of the district, is central to the strategic planning process.

We assist local governments with:

- Community engagement to identify key issues, values and aspirations
- Developing integrated practical strategies and activities aligned to the strategic objectives for the delivery of future services
- Forming and updating Council plans

Strategic Resource Planning

Combining and integrating asset management, long term financial and workforce planning processes a Strategic Resource Plan is developed to support a deliverable Council Plan. A key objective of our Strategic Resource Plan is to highlight and define key long-term strategies to maintain financial and asset services to the community over the long term. The strategies are aligned to the objectives of the Council Plan and capable of supporting Service Plans.

Long Term Financial Planning

With our in-depth accounting knowledge, we have a thorough understanding of long-term financial planning. We are experienced in working with local governments as they plan for the long-term delivery of services to their communities in line with their strategic objectives.

Asset Management Planning

The most important outcome from integrated planning is the development of strategies to respond to financial and asset information and the existence of any asset maintenance and renewal gaps.

We work with local governments to utilise available asset information and to plan for the provision of asset services to their communities in the most efficient way within the known financial constraints.

Workforce Planning

Access to a skilled and knowledgeable workforce to service the community and achieve its objectives is essential.

Workforce planning helps an organisation identify key risks to its workforce and provides a guide to deal with these risks in a structured way.

Service Planning

Service planning is the most detailed form of strategic planning and essential for true performance reporting. Service plans articulate to the community and Council the services to be provided within resource constraints and how performance will be measured.

We assist local governments with:

- Defining their service areas, services and activities
- Service level planning
- Service performance reporting
